

DuraSea Rooftop A/C for work boats

A/C unit for heavy-duty applications at sea

Easy to install –
no ducting, no
plumbing required

NEW

Here's an A/C unit whose design and construction is so robust and solid that it's virtually unaffected by inhospitable weather conditions at sea. With a cooling capacity of 15,000 BTU/h, Dometic's DuraSea Rooftop Air Conditioner is the ideal cooling solution for supply vessels, patrol boats, and houseboats.

With a top plate made of 0.40 mm galvanized steel and a powder-coated base pan (15% thicker than comparable models), this A/C unit is all about heavy-duty quality. All fans and the coatings on the evaporator, condenser and compressor are corrosion-resistant. All refrigerant lines are made of copper.

The A/C unit, which is air-cooled, can be installed on any flat horizontal deck or rooftop location to cool the area directly below it. Located on the underside of the unit – which is accessible from the interior cabin – are the thermostat and fan controls as well as the return-air vent and two supply-air vents that blow in opposite directions for increased cooling capability. The three-speed high-performance fan works in cooling mode and in ventilation-only mode.

Despite its high performance level and rugged construction, this rooftop A/C unit weighs just 46,7 kg. Strong L-brackets turn the

motor, compressor and evaporator into a single vibration-free unit. This also stabilizes the compressor and prevents any unwanted "play" in the assembly.

The optional integrated Breathe Easy™ air purifier uses photocatalytic nano-mesh technology to reduce odors, mold spores, viruses, and bacteria by up to 99.9%. It works in both the cooling and ventilation modes.

- | Robust design, lightweight
- | Energy efficient
- | Corrosion-resistant components
- | Vibration-free operation
- | Breathe Easy™ air purifier as an option

DuraSea Rooftop A/C for work boats

2.12

Capacity (BTU/h)	15,000
Run Amps	15.8
Locked Rotor Amps (LRA)	66
Refrigerant Type	Green gas
Dimensions (W x H x D)	334 x 759 x 886 mm
Net Weight (kg)	46.7 kg

Expected to be available from August 2012.

More information at your local dealer.

NEW

Ready for rooftop/
desktop mounting

Optional
Breathe Easy™
air purifier

The integrated Breathe Easy™ air purifier is easily removed for UV bulb replacement

The air distribution box (sold separately) mounts on the ceiling to provide A/C controls

Compressor is bracketed at top and bottom to minimize vibration and movement
